Educational Technology

Bachelor of Science

University of Central Florida

2009-2013

English Language Arts Education

CERTIFICATIONS

Microsoft Technology Associate:
Database Fundamentals

PROFILE

After 7 years as a technology-forward educator, I wanted to learn more about the software that I had been using in my classroom; this is where my journey to becoming a self-taught programmer began. Now, I am a UI/UX Software Developer that is equipped with all of the soft skills that are sharpened by a teaching career, and has the capacity to never stop learning. I am seeking new opportunities that will allow me to explore new, modern technologies, continue to grow as a software development professional, and contribute to innovative and dynamic projects.

EXPERIENCE

Software Developer

Hudson Headwaters 340B 2021-Present

- Function as principal front-end developer on technology team; optimize and write reusable front end code across 4 proprietary applications
- Lead projects and initiatives for both client-facing and internal applications and serve as head of the cross-departmental committee that makes decisions on new tools and features
- Perform code reviews and work with peers to solve technical problems and improve existing code
- Produce robust, clear, up-to-date documentation and wikis for 6 new features
- Mentor 1 new developer and 1 new tester in existing front end codebases and flow of data from the back end to the front end
- Give a presentation at our Client Forum conference on new features in our Client Portal for 200+ attendees
- Build 5+ new large-scale features within our Client Portal to increase self-service capabilities and provide tools for clients that competitors do not offer
- Ensure compatibility of all proprietary applications across various platforms
- Research and learn new libraries, frameworks, and languages as necessary for modernization of existing applications and development of new applications
- Develop and utilize APIs; maintain scalable and performant .NET, Azure WebApp applications
- Contribute to, and follow, procedure surrounding version control, implementation, and CI/CD
- Deliver training sessions to non-technical departments in the organization
- Meet with clients to brainstorm new features and gather feedback on existing features

Webmaster

Adirondack League Club 2020-2021

- Maintained and organized all aspects of the Club's website and SMS notification services
- Supported the membership database and Google Analytics account
- Used user analytics data to drive improvements that increased traffic in specific areas
- Solved technical issues and found solutions within the web application
- Collaborated with Club membership and management to obtain and update content of website and Club communications
- Wrote code for custom user interface components
- Ensured functionality of systems as a whole to meet the individual and unique technical needs of the Club
